

PEATS SOIL & GARDEN SUPPLIES

Peats Soils

Company Profile

Peats Soil is one of the leading companies in Green Organics recycling in South Australia. With over 30 years experience Peats collects green organic materials from selected municipal areas, which is then composted into a valuable nutrient source and soil conditioner. The company operates a fleet of vehicles which brings raw materials into the Willunga depot and delivers processed materials throughout South Australia.

Recycled green organics are blended with other organic ingredients and composted to produce rich mulches and soil conditioners which are ideal nutrient and humic acid sources. Since 1999 Peats Soil has been working with a number of wineries throughout South Australia composting winery residuals on site.

Core Business

- **Collection and controlled composting of green organic materials for soil conditioning and enhancement products**
- **Development of an in-vessel composting system to collect putrescible green waste from many sources.**

Products

- **Packaged Products: potting mixes, mulches, ground covers and composts**
- **Viticulture & Nitra Mulch ®**
- **BiobiN ®**

Facts and Figures

- A South Australian company since 1972.
- Employs 75
- Recovers and recycles 40,000 tonnes of Green Organic waste annually
- Capital Investment AUD \$8 million
- Product certification to Australian Standards-3743 for 7 soil products
- 75,000 tonnes of winery residual recovered and reused from on-site composting
